ABOUT ME

I am a passionate software engineering student who enjoys the challenge and process of problem-solving. In my 3rd year of university, I am actively seeking part-time work to supplement my university learnings and apply the skills I gained at my last two internships. I am actively seeking a role as a developer in a company that highly values innovation, culture and cooperation.

EXPERIENCE

2018-19

INTERN
ATLASSIAN

Interned as a Software Engineer on an incident management product team.
- Series of front-end features delivered in React-Redux.
- Exposed to company best practices - storybook component testing, product incident reports, feature flagging, retros, devOps.
- Small features and bug fixes in a Kotlin microservice and Java monolith.

2017-18

INTERN
COMMONWEALTH BANK, ENTERPRISE SERVICES

Interned as a Software Engineer working on a mobile and online insurance product.
- Developed end-to-end browser test automation using Selenium WebDriver, contributing to suite of regression tests.
- Contributed to team's goal of continous integration by stubbing downstream dependencies in mountebank to decouple testing from test environment.
- Used FiddlerCore to implement a webanalytics verification project, to intercept and verify that analytics tags are fired, reducing load on manual testers.

2016-17

CO-FOUNDED COMMUNITY INITIATIVE
YOUR TECH MATE, COFFS HARBOUR

Your Tech Mate is a service which aims to address the growing technological and social divide in my local community. The service links passionate, tech-savvy students with those struggling with tech-literacy for troubleshooting and tuition.
- Won 2016 UNE Business Innovation Challenge by pitching idea.
- Refined business communication skills liasing with mentors and co-founders.
- Developed website for client contact.
- Recieved grant from Innovation Nation Australia in 2017.
- Typical tasks included liasing with clients and connecting them with students, managing bookings and tutoring clients.

EXPERIENCE / EXPOSURE

Java, Python, React, Redux
